PROFESSIONAL SUMMARY

Computer Science Engineering undergraduate with practical experience developing full stack applications. Proficient in React.js, React Native, and Tailwind CSS for frontend development, and Node.js, Express.js, and PostgreSQL for backend logic. Skilled in designing RESTful services, integrating JWT authentication, and optimizing SQL queries. Passionate about learning new technologies and applying them to solve real-world problems.

EDUCATION

Manipal University Jaipur	2027
<i>B.Tech in Computer Science and Engineering</i>	
Ahlcon Public School, Delhi	2023
<i>Senior Secondary Certificate (12th)</i>	<i>Percentage: 81%</i>
Mayoor School, Noida	2021
<i>Secondary School Certificate (10th)</i>	<i>Percentage: 95.3%</i>

TECHNICAL SKILLS

Programming: JavaScript, SQL, Java, Python
Frontend Development: React.js, React Native, Tailwind CSS, DaisyUI
Backend Development: Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access Control
Databases: PostgreSQL, MongoDB
Tools: Git, Postman, Expo, VS Code

INTERNSHIPS

Data Analytics Intern	June – July 2024
<i>Aero Survey</i>	
- Processed and analyzed aerial data for aviation-related projects including NOC and OLS (Obstacle Limitation Surfaces) surveys. - Worked in a team supporting regulatory compliance and safe infrastructure planning around airports and airstrips. - Certificate: View Certificate	
Full Stack Developer Intern	May – July 2025
<i>Orane Consulting</i>	
- Developed full stack web applications including user authentication dashboard, task manager, and employee attendance tracking system using React.js, Node.js, and PostgreSQL. - Worked on a company's live project and developed a complete backend for a ticket management system, where customers raise support tickets and delivery leads assign and track agent resolutions. - Built RESTful APIs with JWT-based authentication and role-based access control. - Designed responsive UIs with React.js, Tailwind CSS, and DaisyUI. - Created a mobile application using React Native to track user's real-time geolocation. - Collaborated on API integration, modular backend architecture, and frontend logic across platforms. - Certificate: View Certificate	

PROJECTS

Employee Attendance Management System <i>Full Stack Web App</i>	2025
- Built a full stack web application to track employee attendance, leaves, breaks, and manual entries. - Developed using React.js, Node.js, Express.js, and PostgreSQL. - Features include punch in/out, leave management, manager approval workflows, and real-time dashboards. - Implemented JWT authentication and role-based access control for secure data access.	

Ticket Management System | *Backend & API Development*

2025

- Developed a scalable backend for a customer support platform enabling customers to raise tickets and support teams to manage and resolve issues.
- Built using Node.js, Express.js, and PostgreSQL with JWT-based authentication and role authorization.
- Integrated email notification service (Nodemailer) to notify customers and agents on ticket events.
- Tested APIs using Postman and implemented centralized error handling and validation middleware.

Mobile Geolocation Tracker App | *Cross-Platform Mobile App*

2025

- Built a cross-platform mobile application to track user's real-time location using React Native and Expo Location API.
- Backend powered by Node.js, Express.js, and PostgreSQL; displays live location updates with extensibility for movement history tracking.

Task Manager Web App | *Full Stack Productivity Tool*

2024

- Developed a task tracking and productivity tool for managing to-do lists with deadlines and statuses.
- Built with React.js frontend and Node.js + PostgreSQL backend; includes task CRUD, user authentication, and a responsive UI using Tailwind CSS.
